DuPont[™] Surlyn[®] 8140

Description

Product Description

DuPontTM Surlyn[®] 8140 thermoplastic resin is an advanced ethylene/methacrylic acid (E/MAA) copolymer, in which the MAA acid groups have been partially neutralized with sodium ions. The amount of MAA and neutralization levels for this grade are optimized to deliver higher hardness and stiffness compared with other sodium ionomer grades of Surlyn[®]. The resin is ideal where high stiffness, high clarity and good abrasion resistance are desired. In golf ball covers, the resin provides good cut resistance, impact durability, high resilience and increased coefficient of restitution, particularly when used in blends with other cations. The resin is normally injection molded.

Test Method

ASTM D1052

Properties

Physical

	Density	0.96g/cm ³	ASTM D792 - ISO 1183
	Melt Flow Rate (Condition E, 2.16kg)	2.6g/10 min	ASTM D1238 - ISO 1133
Thermal		Nominal Values	Test Method
	Brittle Temperature	not yet determined	ASTM D746
	Melting Point (DSC)	189°F (87°C)	ASTM D3418 - ISO 3146
	Vicat Softening Point (Rate B)	136°F (58°C)	ASTM D1525 - ISO 306
	Freezing Point (DSC)	113°F (45°C)	ASTM D3418
Mechanical		Nominal Values	Test Method
	Abrasion Resistance	426NBS Index	ASTM D1630
	Flexural Modulus (73 °F)	517MPa (74985psi)	ASTM D790
	Flexural Modulus (-4 °F)	not yet determined	ASTM D790

not yet determined

Ross Flex (compression molded, 3.2 mm thick, pierced 2.5 mm wide, 73 °F)		
Ross Flex (-20 °F)	not yet determined	ASTM D1052
Tensile Elongation @ Break (73 °F)	325%	ASTM D638 – ISO 527–2
Tensile Strength @ Break (73° F)	36.5MPa (5294psi)	ASTM D638 – ISO 527–2
Tensile Strength @ Yield (Type IV bars, compression molded, 5.0 cm/min, 73 °F)	20MPa (2901psi)	ASTM D638
Impact	Nominal Values	Test Method
Notched Izod Impact (73 °F)	not yet determined	ASTM D256
Tensile Impact Strength (73 °F)	606ft-lb/in ²	ASTM D1822
Tensile Impact Strength (73 °F)	606ft-lb/in ²	ASTM D1822
Hardness	Nominal Values	Test Method
Durometer Hardness (Shore D)	65	ASTM D2240 – ISO 868
Optical	Nominal Values	Test Method
Haze (0.250 in)	1.7%	ASTM D1003
Elastomer	Nominal Values	Test Method
Tear Strength (73 °F)	not yet determined	ASTM D624
Processing Information		
FDA Status	Surlyn [®] industrial resins are available that comply with US FDA 21 CFR 177.1330. For more information contact your DuPont sales office.	
Safety & Handling	Surlyn [®] 8140 as supplied by DuPont is not considered a hazardous material. As w any hot material, care should be taken to protect the hands and other exposed par of the body when handling molten polymer. At recommended processing	

Surlyn[™] 8140 as supplied by DuPont is not considered a hazardous material. As with any hot material, care should be taken to protect the hands and other exposed parts of the body when handling molten polymer. At recommended processing temperatures, small amounts of fumes may evolve from the resins. When resins are overheated, more extensive decomposition may occur. Adequate ventilation should be provided to remove the fumes from the work area. Disposal of scrap presents no special problems and can be by landfill or incineration in a properly operated incinerator. Disposal should comply with local, state, and federal regulations. Resin pellets can be a slipping hazard. Loose pellets should be swept up promptly to prevent falls.

For more detailed information on the safe handling and disposal of DuPont resins, a Product Safety Bulletin and OSHA Material Safety Data Sheet can be obtained from the DuPont Packaging Products sales office serving you.

Read and understand the Material Safety Data Sheet (MSDS) before using this product
